

High FREQUENCY VIBRATING TABLE VSB 15

Vibrating table is designed for compacting concrete mixes in the test moulds. Thus made concrete sections are intended for further laboratory tests.

The device consists of a frame on which is placed over the rubber springs working vibrating plate. The bottom plate is fixed to the vibrating member with its own electric motor. Controlling the table is done by the electric control panel, located outside the machine, pedal /design NS/ or both elements. On the upper surface there is a rubber mat. Table is available in painted or galvanized finish.
 Option: mechanical clamping of moulds, or triac speed control.
